# SPiVi®

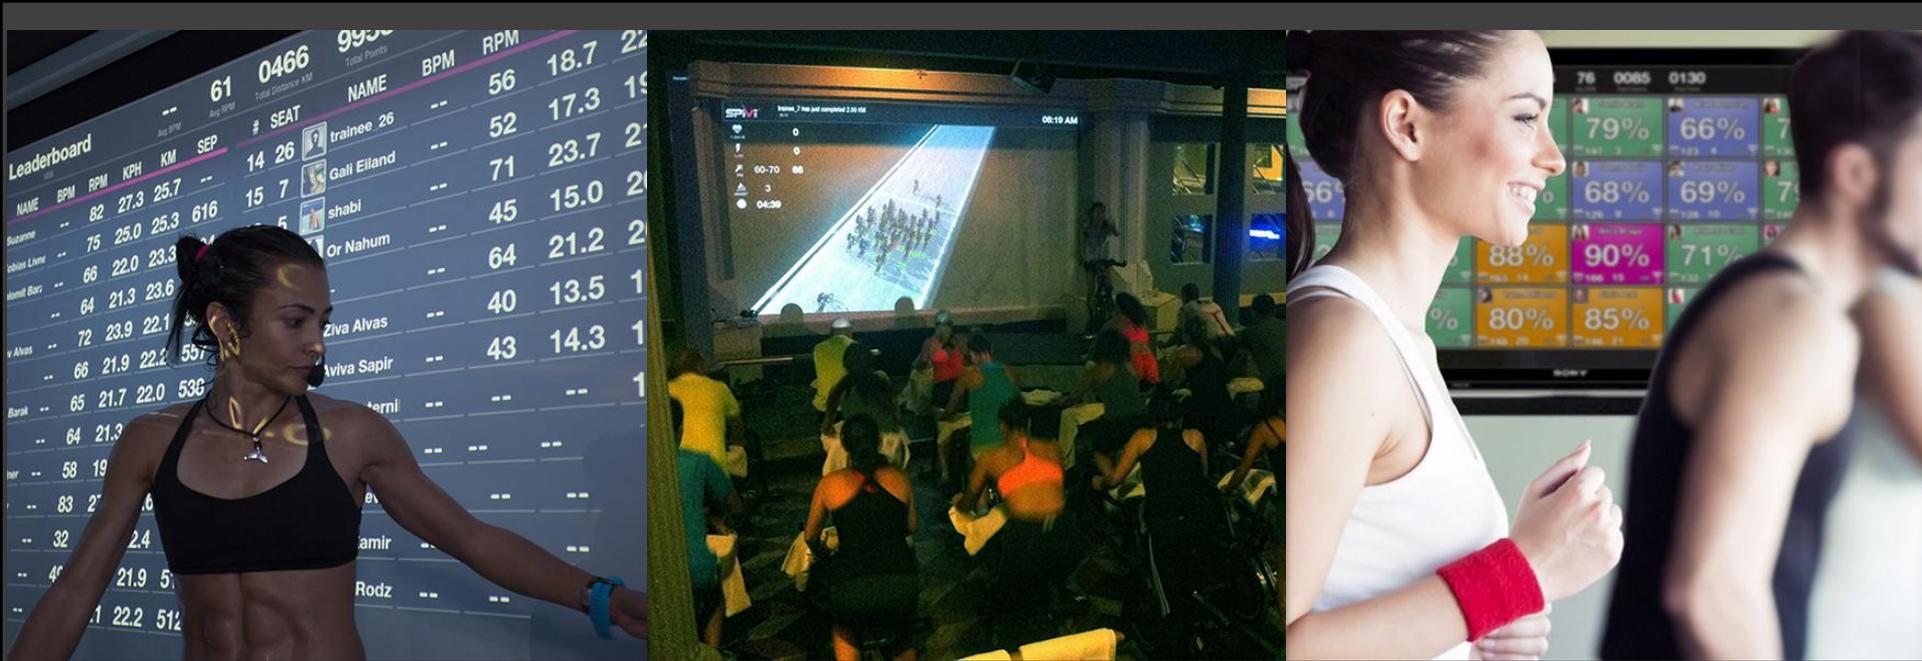

SMART TRAINING SYSTEMS  
FOR STUDIOS AND FITNESS CLUBS

[www.spivi.com](http://www.spivi.com)

**Track progress · Show results · Keep them engaged**

## Real time performance tracking for all **Group Fitness** activities

Give your members immediate feedback, display their real-time performance data and keep them motivated by rewarding their effort.

**Amazing User Experience**

**High-Res Data Analysis on  
Different Levels**

**Widgets, Reports and Tools  
for Owners and Admins**

**Integration with Leading  
CRM Partners**

**World Wide**

# Recruit **New Customers** Reduce **Members Dropout** Keep **Members Engaged**

Spivi® is an innovative platform made for **studios and fitness clubs** who want to increase revenue and recruit more customers.

Installed on existing equipment and compatible with most bike and heart rate sensors brands, Spivi® products collect data such as power, cadence and speed from sensors on each bike and heart rate data directly from members' HR straps. They combine the data with personal information such as age, weight and performance history they keep on the cloud, and generate unique visuals such as group simulation, dynamic videos, leaderboard and targeted performance views in real time.

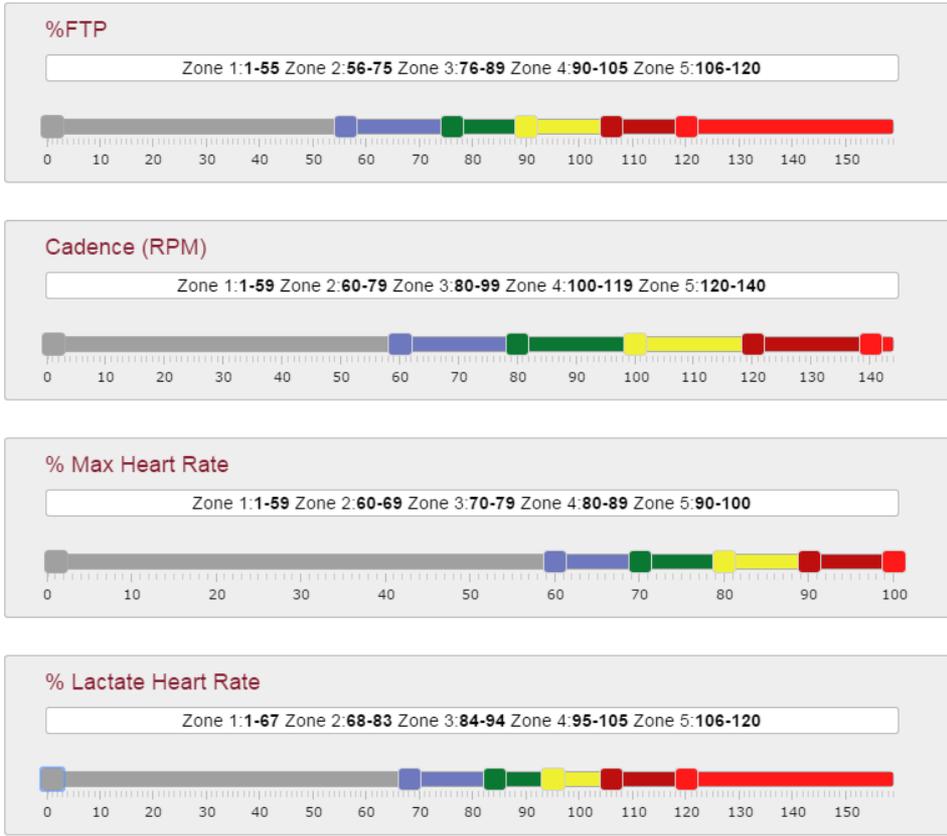

Data analysis is available for your members on-line to review and share with friends!

## Target Views

Equalize everybody to their fitness levels, train with Functional Threshold Power (FTP) or %Max HR.

Set the ranges and colors of your %HR Max, %LHTR, %FTP and RPM zones.  
Settings will get uploaded to your Spivi system every time you start a new class.

# Easy To Theme and Customize

Set up your zones' colors and ranges to meet your studio needs

## Dynamic Leaderboard

Spivi Studio® and Spivi® MetriX offer many options and attributes to select from: Profile Picture, Rider Name, bike number, Watts, %FTP, Watts/Kg, Energy, Heart Rate BPM, %max Heart Rate, %LTHR, RPM, Speed, Distance, Calories, Spivi® Points and Rank. Members can select what they see on screen via their personal privacy settings.

## Real-Time **Simulation**

With Spivi® Studio, instructors can select different tracks and control the animation in real-time using a wireless controller. They can create inclines and declines, change road angles and speed, control “Camera” views, create sunsets, control the time of day, zoom on different members and more.

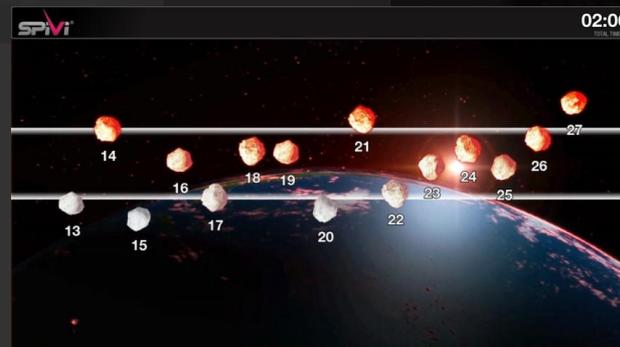

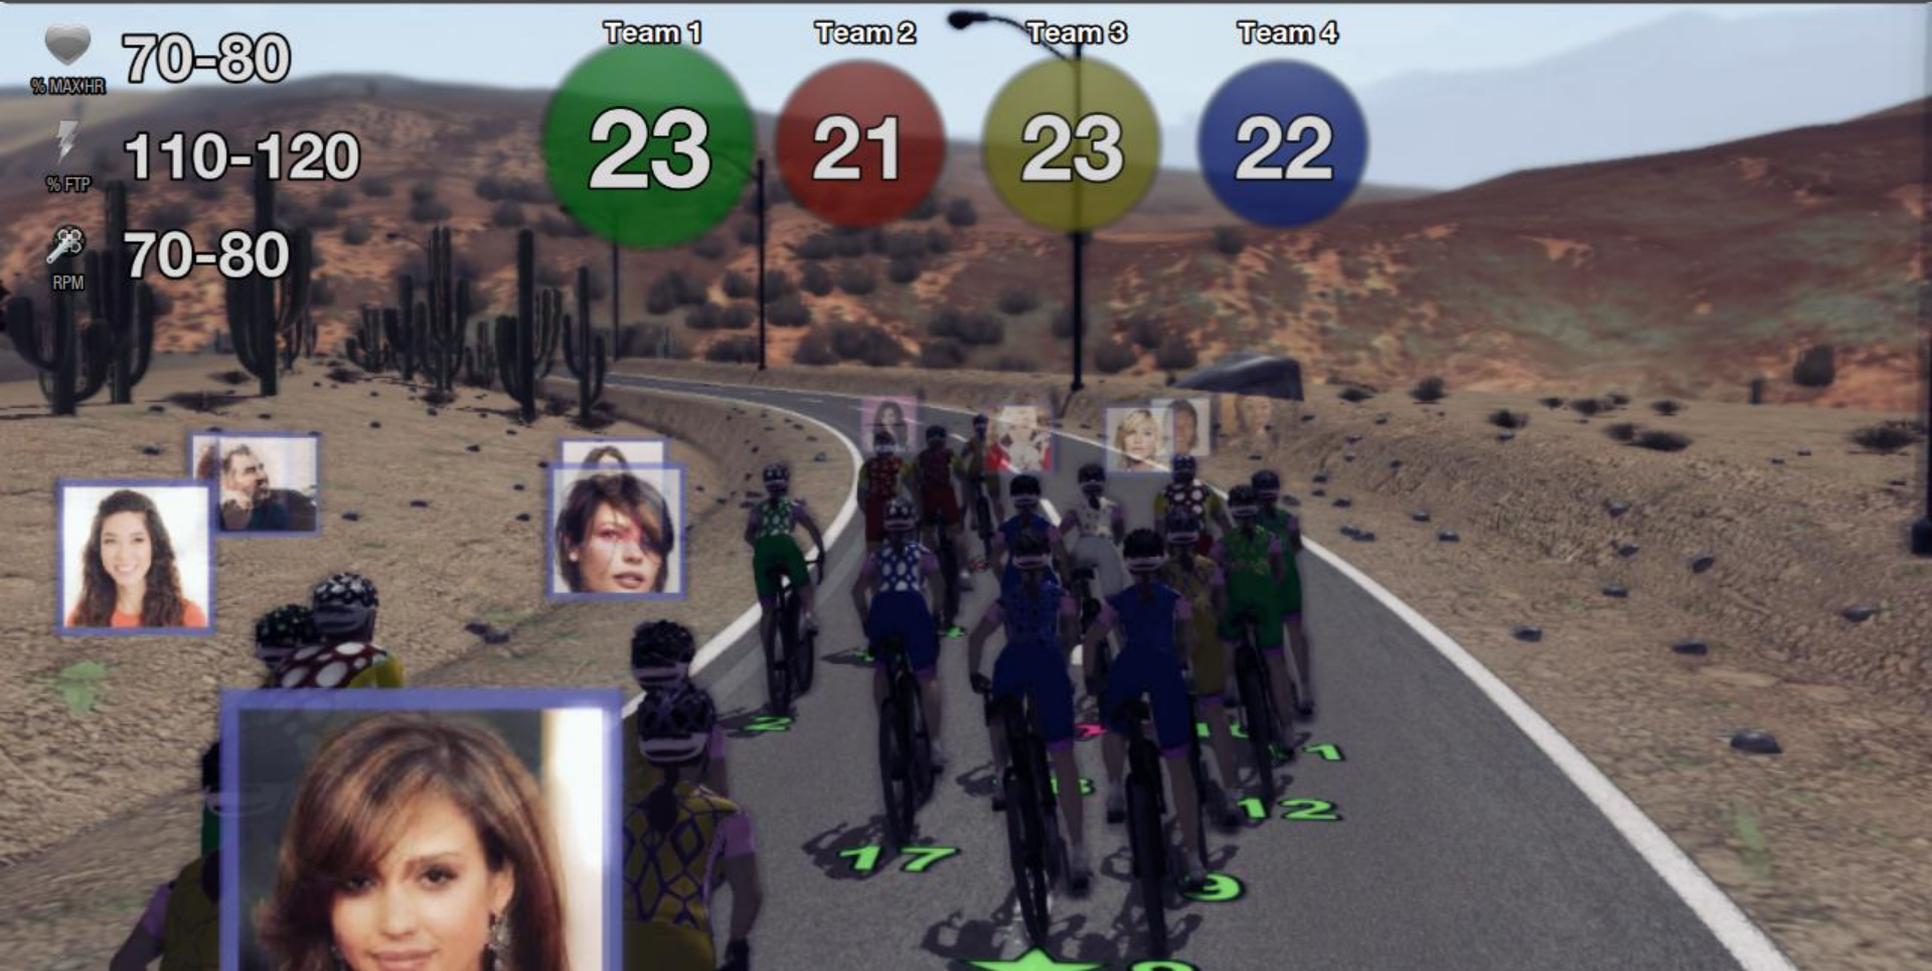

Many visual enhancements were made to make the 3D environment so realistic. We made the scenery more alive and richer with details and elements, added camera filters and created a real-time world manipulation engine, all to produce realistic rides, which can be controlled by both your studio instructors and by our virtual instructors.

## Virtual Worlds

Gamification of fitness activity turns your classes into a thrilling experience and challenges your members to take more classes.

Take your members through virtual worlds, go on a space travel, challenge them to burn calories, reach distance, generate energy and much more!

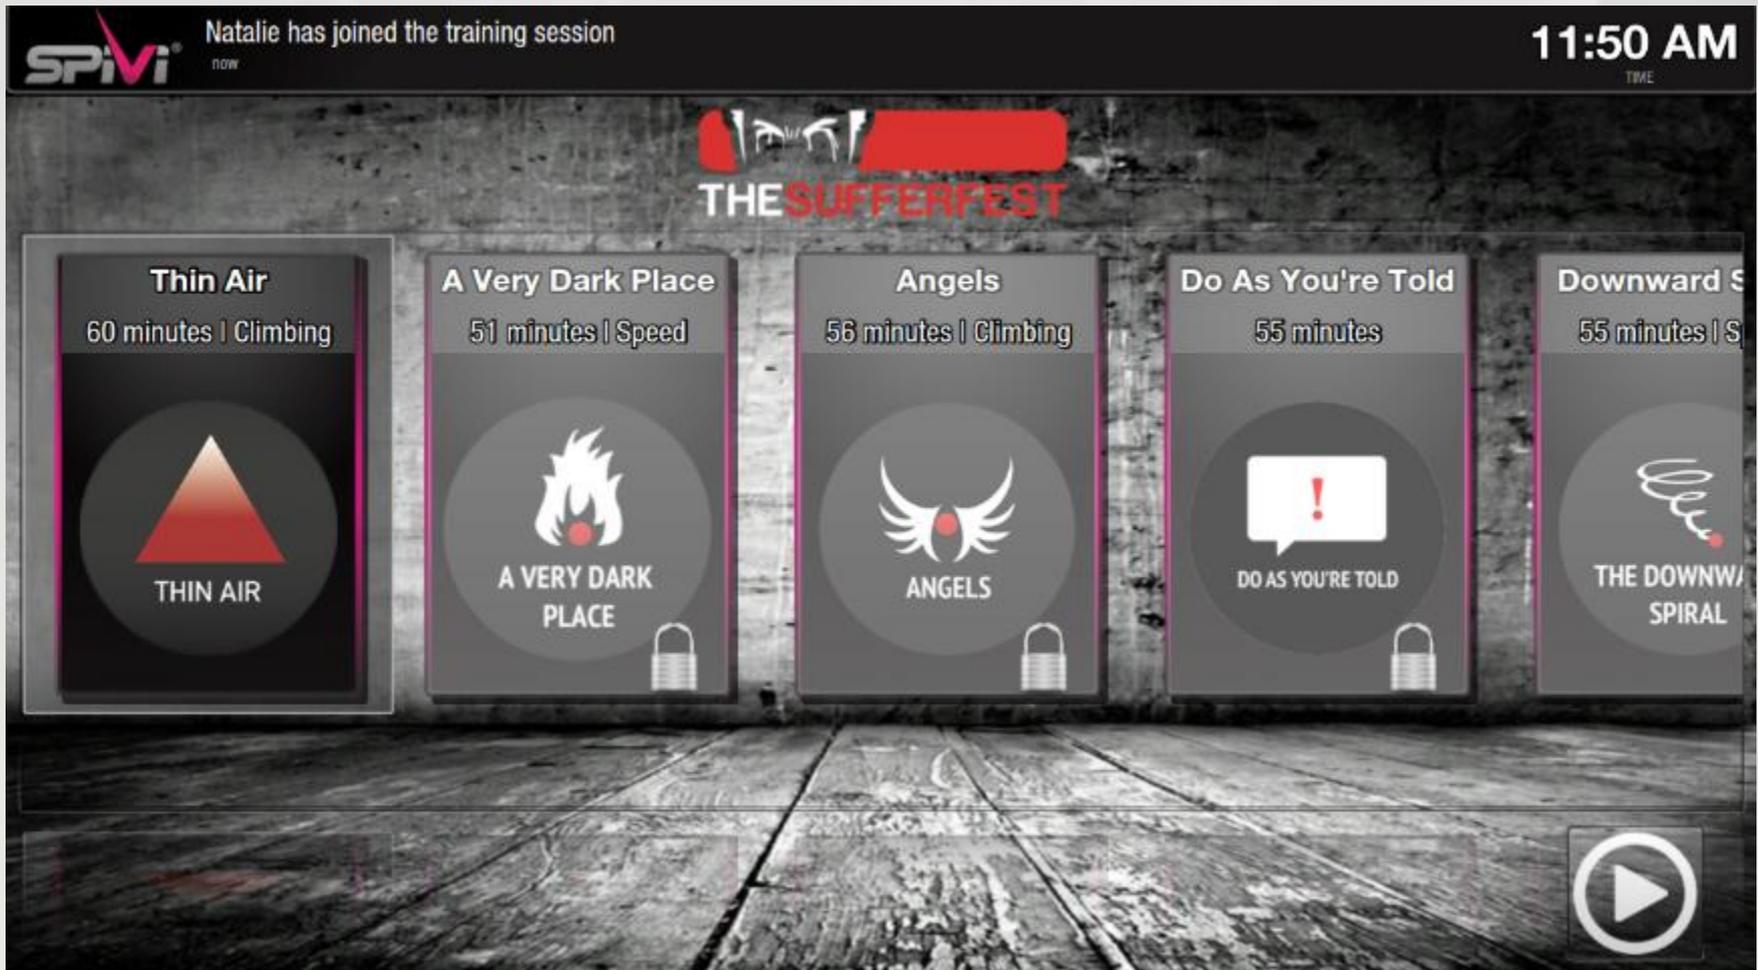

## Team Ride

Go for a Team Ride, challenge your teams to reach the highest score and break the monthly leaderboard.

## Run **Virtual Classes** At Off Schedule Time

Spivi® 365 and Spivi® Studio allow your staff to schedule virtual classes and run them for your members all day long. They can select the virtual instructor who runs the class, the type of class and its length. Easy to set, each scheduled class starts automatically at its given time.

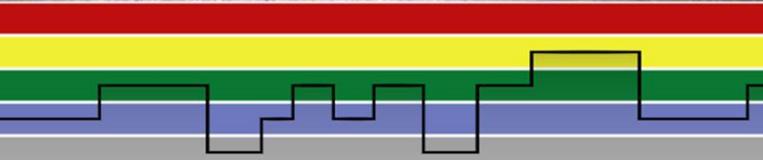

## The Sufferfest (optional Package for Spivi Studio)

The Sufferfest's videos are regarded as the best cycling training videos in the world. With workouts designed by sports scientists, killer music, clear instructions, engaging storylines and incredible video, The Sufferfest has everything you need to run amazing sessions that get huge results for your members.

%MaxHR ● 70-80 RPM ● 01:00

## Maximize Your Investment

Use your studio for personal trainings or with small groups, operate it with your gym staff or with virtual instructors all day long!

The Spivi® platform has many training workouts (class profiles) ready to run, your staff can choose a program from a variety of programs that we offer and run it for a class, small group and even a single member at off schedule hours.

## Create Your Own Workouts

Instructors can create custom workouts and run them with Spivi® in your studio.

Using Spivi® Workout Creator, instructors can easily create workout programs specifically made for your studio needs.

Rank	Location	Display Name	Points

Zone range	% in zone
0-101 bpm	0.7%
102-127 bpm	1.2%
128-144 bpm	1.1%
145-161 bpm	3.3%
162+ bpm	93.8%

## High Resolution Data Collection

Welcome per-second data analysis!

With smart data analysis and a high-resolution data collection, Spivi® is able to provide more information on each workout. Per-second graphs, histograms for power, heart rate and cadence, power zones, heart rate zones and more are available.

## Be a Professional

Spivi® is professional tool for your instructors, it allows them to have full control over their classes, get members' performance feedback live on screen and use reports after each class to encourage and motivate your members.

## Knowledge is Power

As a manager you know how important is to have this information.

Spivi provides administrative reports on class attendance and per member workout.

# Your Studio Gets **Promoted** On-Line After Each Class

Spivi® allows your members to post their results on their Facebook walls after each session. This way your brand and your Facebook page get more exposure every day!

Spivi® automatically posts your new joiners on Twitter.

**Jay Shapka**  
Yesterday at 6:52am · Spivi · 🌐

Today we did a 40 minute continuous interval. Just for fun. People CLAIM they loved it...

**Go Fondo at Cyklus Vancouver**  
I just finished my Go Fondo at Cyklus Vancouver, cycled at an average of 254 Watts with a maximum of 372 Watts at peak, produced 568.2 KJ, burned 557 Calories while riding at an average of 84 RPM during the class. Review my complete results here.

# Spivi® Class Scheduler Widget

## Members Portal on your website

The Spivi® Class Scheduler Widget is a cloud based tool that allows you to manage your classes and bookings online.

It has a built-in feature that can sync with MINDBODY® to provide per bike booking on your website.

Members can book their bikes or mats on-line from anywhere, anytime, from computers, tablets and smart phones.

Spivi® Class Scheduler Widget allows your members to sign up easily with their Facebook account so they never need to remember another username or password.

## Branded Mobile App

Stay connected with your members through your own branded mobile app. Engage your members by tracking their workouts, allow them to view their performance analysis and collect points, participate in club wide challenges and book their classes from their smartphones.

We take care of the branding, deployment and the updates.

**Already got MINDBODY or Zingfit? We're compatible!**

Already working with MINDBODY or Zingfit? Spivi® is compatible with both platforms as well as others so you can have a transparent connectivity between all your systems and continue your already made investment.

Rank	Display Name	Points

	 Carrill	 9507

## Leaderboard **Widget**

With the Spivi® Leaderboard Widget you can embed a class leaderboard on your own website in a few simple steps.

Get an up-to-date list that summarizes your members' Spivi® points from all of their recent workouts with four optional views:

This week, Last Week, This Month, Last Month

You can use the leaderboard to encourage people to gain more points and by that purchase and participant in more classes.
